

EDUCATION ACTIVITY PACK

June/July 2020

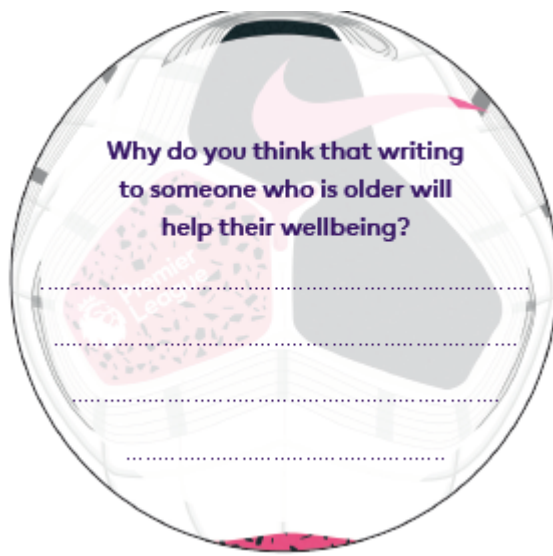

**Premier League
Primary Stars**

English

Being Connected is a Premier League value. It influences the way we think, communicate and behave with each other and the world around us.

It's important to stay in touch with friends, family members and neighbours when we can, particularly if they are older or isolated. That is because staying connected can help them feel less lonely and worried, helps positive wellbeing and can give them a chance to share their experiences, thoughts and ideas through communication and activity.

Let's think about **why** communication is important. Write your own examples from your experiences in the footballs below. Ask a parent/carer for help if you need it.

Maths

Introduction

We can use bar charts to present data in a clear way. Can you create some bar charts to show some results from Premier League matches?

Instructions

- Read the match report for Wolverhampton Wanderers v Manchester City (Friday 27 December 2019) below.

Wolves came from two goals down to beat 10-man Manchester City. Sterling had put the 2018/19 Champions, Manchester City, ahead despite missing a penalty only minutes before. He then scored again, with a **goal** early in the second-half. However, Wolves dominated with 21 **shots** and eight of those **shots on target**, while Manchester City only managed a third of the number of **shots** and three of those **shots on target**. With 10-men, Manchester City were forced to play more defensively, making 32 **clearances** and 16 **tackles**. In comparison, Wolves only had to make two **clearances** and 13 **tackles**. However, a team performance saw Doherty claim the game for Wolves minutes before the final whistle, with teammates Traoré and Jiménez having also scored **goals** in the second half.

- Use the report to complete the table of match data:

	Wolverhampton Wanderers	Manchester City
Goals		
Shots		
Shots on target		
Tackles		
Clearances		

Maths

- Use your table to draw a bar chart showing the goals scored in the match. Use the checklist on page 3 of this worksheet to make sure you have remembered everything.

1. Bar chart to show goals scored

- Use your table to draw the bar charts showing shots and shots on target from the match. Use the checklist to make sure you have remembered everything.

2. Bar chart to show shots

3. Bar chart to show shots on target

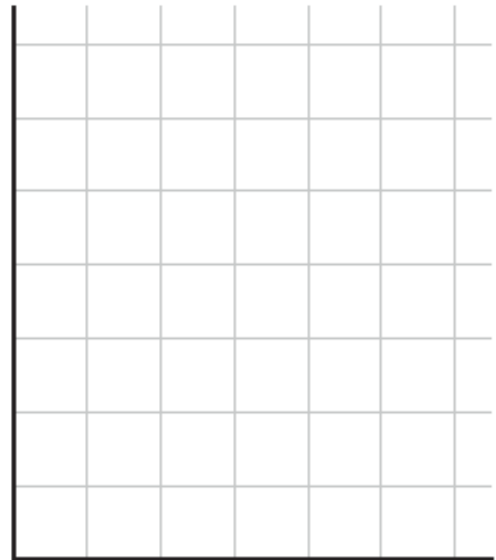

Maths

- Use the space in the grid to draw the final two bar charts, one showing tackles and the other showing clearances. Use the checklist below to make sure you have remembered everything.

4. Bar chart to show tackles

5. Bar chart to show clearances

Checklist:

- I have drawn my bars with a ruler.
- I have labelled my axes.
- I have labelled the bars.
- I have written the scale on the vertical axis.
- I have given my chart a title.

Being kind is important because

My kindness goals for this week are:

Goal one:

Goal scored!

This goal template features a soccer goal frame with a net. Inside the goal, there is a circular icon divided into three colored sections (red, black, and white) with a pink bird-like figure. Below the icon is a radio button followed by the text 'Goal scored!'.

Goal two:

Goal scored!

This goal template features a soccer goal frame with a net. Inside the goal, there is a circular icon divided into three colored sections (red, black, and white) with a pink bird-like figure. Below the icon is a radio button followed by the text 'Goal scored!'.

Goal three:

Goal scored!

This goal template features a soccer goal frame with a net. Inside the goal, there is a circular icon divided into three colored sections (red, black, and white) with a pink bird-like figure. Below the icon is a radio button followed by the text 'Goal scored!'.
